DekPro InvisiCable™

DekPro INVISICABLE
Cable Railing Systems

GREAT VALUE!

Cable Railing for Wood Systems

Cable Brace

Support

4x4 Minimum →

← 48" Maximum →

3-1/8" Spacing on Center

Bottom Rail (optional)
A simple, affordable cable railing option for the value conscious consumer that wants the look of cable but at a lower cost. Proudly made in the USA of 316 marine-grade stainless steel components and cable.

Kit includes 1 run of cable with 2.75" broached threaded tensioner, Pull-Lock fitting, two end caps, washers and brass Nylock hex nut. Kits are field trimmable to the proper length and come in 5' increments to 30' then 40' and 50'.

Don't confuse this kit with a competitors – we include **BOTH** end caps in each kit!

Perfect for interior and exterior use – decks, docks, balconies and stairways utilizing wood or solid composite posts. Fittings are concealed in the post creating a clean, almost invisible infill. Holes are drilled straight through the post and no angled holes or beveled washers are required.

Backed by ADI™ and DekPro™ Manufacturing with a 10 Year Warranty

THREADED STUD With Cap, Nut and Washer

PULL-LOCK™ Lag

DekPro InvisiCable™
Framework for Cable Railing

Guidelines for proper installation of the ADI™ cable railing system by RailFX™

- Use minimum 4x4 wood posts.
- Top rail is **required** to support posts. (Bottom rail is optional)
- Cables to be spaced at 3-1/8" on center.
- Cable must be supported every 48" to keep the cable from deflecting over 4" to pass code.
- Cables are to be tensioned to **225** lbs of tension minimum.
- 36" Rail height typically uses 10 runs of cable, 42" rail height typically uses 12 runs of cable.
- Lag style cable fittings are required for cable being used with sleeved posts.
- If two posts are used on a corner of the deck, the cable can run through the corner
  by making a 45 degree turn through the posts with the use of post protector tubes.
For level runs:

224 Series (outside to outside)
  2-3/8″ Invisiware® Receiver
  to Pull-Lock®.

FlexFX - Level Cable Fittings
  Lag style, Swageless Push-lock fittings.
  Level Tensioner & Non-Tensioner

For stairs, pitched runs:

FlexFX Cables w/ Painted Wood Rail
Cable Railing Tools

Post Protector Tubes

Sold in packs of 10.

Stainless Steel protector tubes are inserted into wood post where cable enters/exits at an angle to prevent cable from biting into the wood. 1/4″ diameter with 3/8″ tapered end.

Item #: ICTUBE/10 - 3/4″ Length - 10 pack
Item #: CSTUBE6 - 1-1/2″ Length - Individual

Made in USA

Cable Cutters

Sold in any quantity.

Cable cutter designed for clean, burr free cutting of 1/8″ stainless steel cable. Required for use with FlexFX™ lag style fittings.

Item #: RFXC7HIT - for 1/8″ Cable
Item #: RFXC9 - for 3/16″ Cable

C9

Push Lock Release Key

Sold in any quantity.

Release key allows the release of an untensioned cable from Pull-Lock™ and FlexFX™ fittings. Also used to release fittings to aid installation.

Item #: RFXPLKEY/R

Cable Gripping Pliers

Sold in any quantity.

Used to securely grip cable to avoid winding during installation which eliminates the most common issue of cables losing tension. Cable gripping pliers are recommended for professional installers.
Item #: RFXPLIERS

Cable Railing Systems ■ ADI™ Cable Railing by RailFX™

Cable Railing Systems ■ ADI™ Cable Railing by RailFX™

Cable Cut Off Kit

Sold in any quantity.

Used to cut cable flush to the end of Pull-Lock™ fittings and excess threads from stud type tensioners. Includes mandrel and 2 cut off wheels.

Item #: RFXCUTOFFKIT/R

Push-Lock Lag Driver

Sold in any quantity.

Huge time saving tool makes installing the FlexFX™ non-tensioning lag fitting quick and easy. Used with WLN series cable fittings.

Item #: RFXDRIVER/R

ADI™ Cable Railing Basic Install Kit

Sold as a Kit.

Installation tools for basic cable railing installations. Kit includes 29/64″, 7/32″, 9/32″, and 5/32″ diameter high quality Norseman drill bits, 2 cut off wheels w/ mandrel, push lock release tool, 3/16″ heavy duty hex wrench, 1/8″ hex wrench, and 7/16″ wrench

Item #: ADICRKIT

FlexFX™ Cable Railing Install Kit

NEW

Sold as a Kit.

Installation tools for FlexFX™ Swageless lag style cable railing. Kit includes 7/32″, 1/4″ and 5/32″ diameter drill bits, 2 push lock release keys, cable gripping tool, Push-Lock lag driver, 5/32″ allen wrench, and 2 - 3″ combo wrenches.

Item #: RFXINSKIT

NEW

Cable Lacing Needle (1/8″ Cable Only)

Sold in any quantity.

Used to pass 1/8″ cable through posts without snagging / fraying during installation. Fits 3/16″ diameter hole or larger.

Item # RFXNEEDLE - Cable Lacing Needle

QuickGrip Cable Tool

Sold in Packs of 2.

Used to grip cable to avoid winding during installation which eliminates the most common issue of cables losing tension.
Tool is recommended for single installations.
Item #: RFXGRIPPER

Cable Railing Drill Bits

Sold in any quantity.

For wood, to make 29/64" hole for Invisiware receiver / Pull-Lock fittings. Step drill bit creates a 3/16″ hole for the cable using a single drill bit.

Item #: CSD316 - ADI Step Drill Bit (29/64″ to 3/16″)

Item #: 29/64DRILL - 29/64″ Drill Bit

EZ-Clean Metal Cleaner / Protectant

Sold in any quantity.

Cleaner / Protector dissolves minor corrosion and leaves a protective coating that lasts for months. Includes 8 oz. rust and stain remover and 4 oz. bottle of protectant.
Item #: RFXEZCLEAN
Cable Tension Gauge

Sold in any quantity.

Used to determine proper tension of cables.
Item # RFXPTCR - Tension Gauge

Rail Overview

Manufactured in the USA using aircraft grade aluminum, RailFX™ Aluminum Rail and Cable System has been designed, engineered and tested specifically for use with cable and is approved in all 50 states. The aluminum framework and stainless steel cable allows for railings to be lightweight, while still retaining exceptional durability. Railings will not rust, rot, warp, or split and require minimal user maintenance.

Rail Guidelines

To comply with engineering and testing **posts must be spaced no more than 60″ on center**. Cables are spaced at 3-3/16″ on center to keep the cable from deflecting beyond 4″ to meet code. Single or double posts can be used to create a 90 degree corner for surface mount posts. Two corner posts are required for fascia mount applications. Cable can either terminate at the corner or run continuously through a single corner. Top rail is required for all installations.

Posts

RailFX™ posts for level and stair railings are all predrilled and ready for cable installation. Stairs posts do not come with base plates attached so posts can be placed and mounted where desired for maximizing installation flexibilty. All posts are available for surface mount or fascia mount and available for 36″ and/or 42″ rail heights.

Top Rails

There are 3 styles of top rail that RailFX™ railing utilizes:

Series 200 is a contemporary flat top rail most often used for level applications. Can be used for stairs with the addition of a secondary handrail system.

Series 250 is a square profile that qualifies as a graspable rail and is most commonly used for stairs.

Series 400 is a flat top rail that is designed to accept a wood or composite cap rail.

Framework For Aluminum Sleeved Wood Posts

Top Rail

Cable Brace

4" Aluminum Sleeve over wood 4x4

48" Maximum

3-1/8" Spacing on Center

Guidelines for proper installation of the ADI™ cable railing system by Ultra-tec:

- Use 4" aluminum sleeve with a 4x4 wood post for structural support.
- Top rail is required to support posts. (Bottom rail is optional)
- Cables are to be spaced at 3-1/8" on center.
- Cable must be supported every 48" to keep the cable from deflecting over 4" to pass code.
- Cables are to be tensioned to 225 lbs of tension minimum.
- 36" Rail height typically uses 10 runs of cable, 42" rail height typically uses 12 runs of cable.
- Lag style cable fittings are required for cable used with sleeved posts.
- Cable kits must terminate at corner posts, or posts where the cable is at an angle.

For level runs using wood posts with aluminum sleeves.
(Outside diameter 4" or less)
RFXWLT - Tensioner Fitting
RFXWLN - Non-Tensioner Fitting
and Bulk Cable (100' or 500')

For stairs using wood posts with aluminum sleeves:
(Outside diameter 4" or less)
RFXWST - Stair Tensioner Fitting
RFXWSN - Stair Non-Tensioner Fitting
and Bulk Cable (100' or 500')

(Swageless Level)

(Swageless Stair)

4"

* If using sleeves over 4" in diameter - Use cable kits for composite sleeves. Reference pages 124 - 125
